About us

Shandong Lianchuang Gaoke Automation Co., Ltd. was established in 2014, and its' main products are industrial frequency converters and other industrial control products.

The company is a professional manufacturer of industrial automation control products which integrates research and development, production, sales, and service. It has fully independent intellectual property rights in industrial automation drive control technology. Relying on strong research and development strength, adopting internationally advanced current vector control technology, and combining years of application experience in automation control, the company has developed domestically leading high, medium, and low voltage inverters, servo controllers, specialized and non-standard customized products. Currently, the company has products of different specifications such as 220V, 380V, 690V, and 220 to 380V, which are widely used in industries such as electric power, petrochemical, steel, oil fields, chemical engineering, building materials, textiles, printing, plastics, machine tools, mining, and other industries.

The company covers an area of 37 acres and owns over 21000 square meters of factory buildings, which have been successfully settled in.

The company has internationally leading SMT production lines, wave soldering lines, automatic coating lines, assembly lines, complete machine prediction systems, PCBA detection systems, and on-load aging test devices.

Currently, there are 10 regional sales centers and transfer warehouses in Xi'an, Zhengzhou, Wuhan, Shenyang, Xinjiang, and other places nationwide, with a complete sales network layout and timely / effective service response to meet customers' needs. The company has passed the recognition of national "High-Tech Enterprise", "Jinan Specialized and Special New", "Provincial Specialized and Special New", and municipal "Gazelle Enterprise". We have successively received honorary titles such as the "Industrial Enterprise Contribution Award", "Advanced Enterprise in Scientific and Technological Innovation", "Excellent Innovation and Entrepreneurship Enterprise", "One Enterprise One Technology Research and Development Center", and passed various qualification certifications such as "ISO9001 Quality System Certification", "Intellectual Property Management System Certification", "CE Certification" for Export to EU, "Software Copyright Certification", and "Integration of Industrialization and Industrialization", Which has laid a solid foundation for the subsequent development of the company.

Lianchuang manufacturing

Lianchuang Gaoke Automation Co., Ltd. currently has 1600 square meters of administrative research and development buildings and 8700 square meters of independent industrial manufacturing bases, with a large number of automated production equipments and complete production lines for various accessories.

The workshop integrates circuit board mounting, plug-in, three proofing adhesive coating, assembly, testing, sheet metal, and heat sink production line. Large, medium, and small power assembly lines are assembled in sections, with simplified procedures and efficient operation to ensure production capacity supply.

Focus on industrial automation products development
and intelligent manufacturing

Company qualification

Lianchuang adheres to the service philosophy of "seeking truth and pragmatism, exploring and innovating, intelligent driving, and scientific management", strictly controls product quality, and has won the recognition of society and customers in the highly competitive market.

Corporate Services

The Lianchuang Service Department has a group of senior frequency converter technical engineers, providing users with professional and fast solutions and technical support. The maintenance centers covering major cities across the country constitute a complete service network and a strong service team.

LP300A SERIES

Book structure high-performance
vector frequency converter

Product overview

The LP300A series uses a DSP control system as a platform, adopts current vector control technology, and cooperates with various protection methods. It can be applied to asynchronous motors to provide excellent driving performance. The product has greatly improved customer usability and environmental adaptability in terms of air duct design, hardware configuration, and software functions. Key components are all made from international brands such as TI, ON, and INFINEON to ensure customer experience.

Capacity range

3PH AC 380V±15%
1.5-400kw

Application area

CNC machine tools, textile machinery, roots blower, lifting, plastic machinery, food machinery, petroleum

Product features

- Book structure design, Modular structure layout ,volume is Max.60% reduced .
- High wind speed design scheme ,High protection reliability structure design
- Higher sealing degree of electronic components
- Stable and reliable performance, support double-row display, and strong adaptability
- Upper and lower straight air duct ,Wide tooth surface heat dissipation structure
- High drive torque characteristics, keep mechanical torque limit .
- EMC protection built in
- PG card expandable for close loop control.
- Powerful and supports multiple field buses
- Standard 485 communication, Can Link expandable.
- Support user programmable control card (PLC card), and the programming method is fully compatible with H1U series PLC

LC410 SERIES

High performance vector frequency converter

Product overview

LC410 model is an upgrade model of LC400. Based on DSP control system, adopt current vector control technology and cooperate with various protection methods. It supports double line screen display, main components used are all made of international brands. The excellent hardware configuration and mature software installed have been proven to be secure and stable by thousands of clients.

Capacity range

3PH AC 380V±15%
1.5-500kw

Application area

CNC machine tools, forging machine tools, textile machinery, Roots blower, lifting and lifting, plastic machinery, petroleum, food machinery

Product features

- Upgrade version of LC400. Universal frequency converter, covering more than 90% applications
- Double line Screen panel appearance.Panel Removable
- Perfect software and hardware protection function. The output frequency can reach to 500Hz, solved the traditional gear limit problem
- Powerful current vector control performance, low noise, excellent energy-saving effect
- Speed tracking, Instantaneous stop, 0.1S acceleration and deceleration, 22G and below are with built-in brake unit
- 47 kinds of fault detection protection are set to effectively ensure the stable and reliable operation of the system
- Extensive expansion card options
- Powerful and supports multiple field buses
- Support asynchronous motor control
- Support user programmable control card (PLC card), and the programming method is fully compatible with H1U series PLC

LC400G SERIES

Double display type frequency converter

Product overview

LC400G model is an upgrade model of LC400 display panel. Double line screen panel appearance. Based on DSP control system, adopt current vector control technology and cooperate with various protection methods. The excellent hardware configuration and mature software installed have been proven to be secure and stable by thousands of clients.

Capacity range

3PH AC 380V \pm 15%
1.5-500kw

Application area

CNC machine tools, Forging Machine, textile machinery ,Roots Blower Lifting, Plastic machinery , petroleum , Food machinery,etc.

Product features

- Double line Screen panel appearance.Panel Removable
- Universal frequency converter, covering more than 90% applications
- Perfect software and hardware protection function. The output frequency can reach to 500Hz, solved the traditional gear limit problem
- Powerful current vector control performance, low noise, excellent energy-saving effect
- Speed tracking, Instantaneous stop, 0.1S acceleration and deceleration, 22G and below are with built-in brake unit
- 47 kinds of fault detection protection are set to effectively ensure the stable and reliable operation of the system
- Extensive expansion card options
- Powerful and supports multiple field buses
- Support asynchronous motor control
- Support user programmable control card (PLC card), and the programming method is fully compatible with H1U series PLC

LC630A SERIES

Economical vector frequency converter

Product overview

The LC630A series frequency converter is a general purpose high performance model for controlling small power Ac Asynchronous motors.the configuration of hardware is designed to be on economic basis but with strong power.It's a most popular model for economic frequency converters due to the good performance and low price.

Capacity range

- 3PH 380V±15% 0.75-22kw
- 1PH 220V±15% 0.4-7.5kw
- 1PH 110V±15% 1.5kw

Application area

Textile, paper making, wire drawing machines, packaging, food, fans, water pumps

Product features

- 110V input 1.5KW available
- 220V input 0.4-7.5KW available
- 380V input 0.75-22KW available.
- Compact good design
- Good dynamic performance
- Super overload capacity
- Rich combination functions
- 485 communication available
- Stable performance

LC640 SERIES

Mini economical vector frequency converter

Product overview

The LC640 series frequency converter is a newly designed model to satisfy simple task but strong performance required applications. The volume is small and configurations are based on economic basis. The constant pressure water supply function makes it widely used in water pump applications.

Capacity range

3PH 380V±15%	1PH 220V±15%
0.75-15kw	0.75-2.2kw

Application area

Textile, paper making, wire drawing machines, packaging, food, fans, water pump

Product features

- Single Phase AC 220V ±15% and three phase AC 380V±15% available
- Mini type. Most Economic design at very competitive price
- Compact design
- Constant pressure water supply function
- RS485 communication
- Good dynamic performance
- Super overload capacity
- Rich combination functions
- Stable performance

Specification and model	Rated output current(A)	Adaptive motor power(kw)	Height(H) Width(W) Depth(D) (mm)

LC880 SERIES

Fans and pumps vector frequency converter

Product overview

The 880 series inverter is the latest current vector inverter developed by our company, which improves low-speed torque and response speed. In terms of software capabilities, it improves the functions of automatic tuning, automatic control, online conversion, and speed tracking of motor parameters. Built-in PID controller and simple PLC. Various fault monitoring and rich terminal configurations meet various industrial transmission requirements.

Capacity range

3PH AC 380V±15%
1.5-200kw

Application area

Food machinery, woodworking machinery, packaging machinery, fans and pumps

Product features

- Special purpose of Water Pumps and Fans
- MPPT setting, Solar Pump Watering Mode
- Powerful PID adjustment function, removable control panel, convenient for using.
- Built in multiple water supply application macros
- Stepless speed regulation leaves the traditional gear limit, and 0-500Hz can be adjusted arbitrarily
- Powerful current vector control performance, low noise, excellent energy-saving effect
- 485 communication interface, supporting MODBUS international standard communication protocol

LP330 SERIES

Direct torque control frequency converter
(LCD Display)

Product Overview

The LP330 series has significantly improved usability, maintainability, environmental friendliness, installation space, and design standards from a customer perspective while maintaining excellent basic performance and functionality. High standard design in the industry, based on years of persistent pursuit of driving technology and accumulated experience in multiple industry applications, continuously leading the industry; High performance, high quality, high power density design, more in line with the user's personal experience.

Capacity range

3PH AC 380V±15%
1.5-400kw

Application area

CNC machine tools, textile machinery, roots blower, lifting, plastic machinery, food machinery, petroleum

Product features

- LCD Display, switch for AC Induction Motor and PMSM motor.
- The industry first promotes IGBT junction temperature real-time monitoring technology, accurately calculating IGBT junction temperature and effectively protecting IGBT
- The sealed design of the entire machine with independent heat dissipation ducts reduces the impact of harsh environments on electronic devices
- The industry is the first to promote full product heavy-duty (120% rated load) high temperature (50 °C)aging testing and inspection, strictly ensuring product quality.

LP300Q SERIES

Special frequency converter for lifting

Product overview

LP300Q is a crane specific frequency converter developed by our company, which can perform V/F control or vector control on AC asynchronous motors. It is suitable for crane equipment with high starting torque, simple debugging, and can achieve 16 speed operation, closed-loop process control, and networking functions of the system.

Capacity range

3PH AC 380V±15%
1.5-400kw

Application area

CNC machine tools, textile machinery, roots blower, lifting, plastic machinery, food machinery, petroleum

Product features

- Built in professional lifting specialized brake timing control. Ensure smooth start and stop of the load
- When the bus voltage continues to be low, reduce the given frequency of the load to maintain the normal output of the frequency converter, and avoid undervoltage faults during operation
- When the bus voltage momentarily decreases or there is a power outage, the frequency converter quickly stops and restricts the continuation to ensure that the hook does not slip
- Automatically calculate the highest achievable output frequency by detecting the output torque of the frequency converter

LC400T SERIES

1PH 220V input--3PH380V output
frequency converter

Product overview

LC400T series 220V to 380V frequency converters are specially developed by us for occasions where three-phase power is lacking. With multiple protection methods and excellent driving performance, they can solve the difficulty of users lacking 380V power. The wiring connecting is simple and easy to understand, and the operation is convenient and practical.

Capacity range

INPUT : 1PH AC 220V±15%
OUTPUT : 3PH AC 380V±15%
1.5-45kw

Application area

Paper making, wire drawing machines, textile machinery, packaging machinery, food machinery, fans and pumps

Product features

- Good hardware configuration and mature software installed proven to be secure and stable
- Good and stable performance
- Comprehensive protection functions
- Fast response speed, easy to control
- Excellent low-frequency counter output
- High control accuracy
- Convenient wiring

LG200A SERIES

Cabinet type high-performance
vector frequency converter

Product overview

LG200A is the latest high-performance cabinet type vector frequency converter launched by our company in response to market demand. It can meet the requirements of various industries with high performance, high flexibility, simple operation, and complete functions. With dual digital tube display, it can meet the different needs of customers.

Capacity range

3PH AC 380V±15%
110-1000kw

Application area

Textile machinery, Roots blower, plastic machinery, petroleum, food machinery, paper making

Product features

- Imported IGBT Infineon Module, with strong carrying capacity and good stability
- Powerful current vector control performance, low noise and excellent energy-saving effect
- Standard built-in reactor, vertical cabinet design, independent air duct heat dissipation
- Humanized design, intelligent control, LED panel dual display, clear and intuitive
- Perfect multiple protection measures for over current, over voltage and lack of voltage
- RS485 serial communication interface, supporting MODBUS international standard communication protocol

LG300A SERIES

690V Input Cabinet Type Strong Power
Vector Frequency Converter

Product overview

LG300A is an upgrade high power model of LG200A with 690V voltage input. The main spare parts used are mostly famous brand imported to gurantee the durable performance. The cabinet design and strong powerful performance can satisfy those applications with higher demanding.

Capacity range

3PH AC 690V±15%
45-1200kw

Application area

Textile machinery, Roots blower, plastic machinery, petroleum, food machinery, paper making

Product features

- 690V Input Voltage
- Power from 45kw-1200kw available
- Imported IGBT Infineon Module, with strong carrying capacity and good stability.
- Powerful current vector control performance, low noise and excellent energy-saving effect.
- Standard built-in reactor, vertical cabinet design, independent air duct heat dissipation.
- Humanized design, intelligent control, LED panel dual display, clear and intuitive.
- Perfect multiple protection measures for over current, over voltage and lack of voltage.
- RS485 serial communication interface, supporting MODBUS international standard communication protocol

LP300Y SERIES

Special frequency converter for
permanent magnet synchronous motor

Product overview

The LP300Y series permanent magnet synchronous controller is mainly used to control and adjust the speed and torque of permanent magnet synchronous motors, and is a technology upgrade product of the LP300 series. LP300Y adopts high-performance vector control technology, with low speed and high torque output, good dynamic characteristics, strong overload capacity, added user programmable function and background monitoring software, communication bus function, support for multiple PG cards, etc. The combination function is rich and powerful, with stable performance, and can be used for driving various automated production equipment.

Capacity range

3PH AC 380V±15%
1.5-400kw

Application area

CNC machine tools, textile machinery, roots blower, lifting, plastic machinery, food machinery, petroleum

Product features

- Suitable for permanent magnet synchronous motor drive control
- High accuracy of self tuning motor parameters
- High stability accuracy and wide speed range
- Low speed with high torque and low torque ripple
- Can achieve complete V/F separation and semi separation
- Can achieve open loop and closed-loop control
- Supports multiple PG cards
- Standard RS485 communication interface

LP330Z SERIES

Spindle servo motor combination

Product Overview

The LP330Z spindle servo motor set is a specialized servo driver developed for the characteristics of the high-speed machining machine tool industry. The spindle servo driver supports high-speed permanent magnet synchronous servo spindles, which can achieve precise dynamic response control and meet the process requirements of drilling, grinding, engraving and milling, and turning and milling composite. It integrates high-speed command input and feedback output interfaces, which can be combined with mainstream controllers in the market to form machine tool electronic control systems, and can also be seamlessly linked with CNC systems with open architecture.

Capacity range

3PH AC 380V±15%
1.5-75kw

Application area

CNC machine tools, machining centers, and mechanical equipment that requires positioning

Product features

- Full closed-loop control of current, speed, and position.
- Adopting multi degree of freedom and nonlinear control algorithms to achieve high dynamic response and high-precision current, speed, and position control.
- Supports high-speed pulse+directional input, with analog, network, and control interfaces.
- Supports high-precision sine and cosine encoders, rotary transformer speed feedback, with a single turn resolution of up to 24 bits.
- Supports high-speed local IO and remote expansion IO.

LC65 SERIES

IP65 High-protection level advanced frequency converter

Product overview

The LC65 series high protection level frequency converter reaches IP65 protection level, and the PCB adopts industrial high protection level UV coating to enhance resistance. Specially designed for harsh environments such as high corrosion, high dust, high humidity, high temperature, and heavy pollution, it is sturdy, durable, and highly protective.

Capacity range

3PH 380V±15%
1.5-315kw

Application area

CNC machine tools, textile machinery, roots blower, lifting, plastic machinery, food machinery, petroleum

Product features

- Fully enclosed chassis design, using three anti paint, waterproof joints, waterproof fans, etc., waterproof, dustproof, oil stain resistant, corrosion-resistant, suitable for use in harsh environments
- Equipped with various motor protection functions
- Smooth operation, low noise, and excellent energy-saving effect
- Standard RS485 communication interface

Specification and model	Rated output current(A)	Adaptive motor power(kw)	Height(H) Width(W) Depth(D) (mm)
LC65-0R75G/1R5P-4T	2.1/3.8	0.75/1.5	255*160*184

Note : LC65 series panel opening size: 147mm high and 79mm wide

LC520 SERIES

Frequency Converter for Elevator

Capacity range

3PH AC 380V±15%
7.5-18.5kw

Application area

Elevator control

Product features

- Suitable for driving control of permanent magnet synchronous motors and asynchronous motors, with multiple rotary encoder interfaces.
- Equipped with motor parameter self-tuning function, it can perform static tuning or complete tuning.
- Support multi segment speed and analog speed setting.
- Flexible start curve processing, multi segment S curve setting, and 4-level acceleration and deceleration time setting can ensure good elevator operation comfort. It has a simple and practical battery operation function, and can complete power outage self rescue with a 48V power input.
- It has various elevator specific functions such as enabling detection, holding brake contactor control, output contactor control, forced deceleration judgment, overspeed protection, speed deviation detection, early door opening, contact adhesion detection, motor overheating detection, starting pre torque compensation, etc., making elevator control simple and feasible.

Specification and model	Rated input current(A)	Rated output current(A)	Height(H) Width(W) Depth(D) (mm)
LC520-7.5KW	20.5	18	248*160*183
LC520-11KW	29	27	322*208*192
LC520-15KW	36	33	
LC520-18.5KW	41	39	

PLC SERIES

New and Original PLC Controller Module

Product overview

The SR/ST CPU module integrates one Ethernet interface and one RS485 interface. By expanding the CM01 signal board or EM DP01 module, the number of communication ports can be increased to a maximum of four, which can meet the communication needs of small automation equipment with touch screens, frequency converters, and other third-party devices.

Application area

Labeling machinery,Pillow packing machinery, Woodworking machinery etc.

Product features

- Rich models with more choices
- Option extension, precise customization
- High speed chip with excellent performance
- Ethernet connectivity, economic convenience
- Three axis pulse, free to move
- Universal SD card for quick updates
- Software friendly, programming efficient
- Perfect integration, seamless integration

Model	SR20	SR30	SR40	SR60
On-board digital I/O	12 Input/8 Output	18 Input/12 Output	24 Input/16 Output	36 Input/24 Output
High speed counting	6 Routes			
High speed pulse output	-			
Number of communication ports	2~4			
Expand the number of horizontal blocks	6			
Number of expansion signal boards	1			
Maximum switch quantity I/O	216	226	236	256
Maximum analog I/O	49			

LCJ20 SERIES

Kitchen Fan Specific Frequency Converter

Capacity range

3PH AC 380V±15%
4-22kw

Application area

Kitchen fan

Product features

- Stainless steel wire drawing box, enhancing overall aesthetics
- Smooth start stop reduces wear and tear
- Eliminate motor electromagnetic noise and reduce system noise
- Multiple protections such as missing items, short circuits, overload, insulation damage, etc
- Tailored for the kitchen, more suitable and economical
- Touch screen design, intelligent energy-saving of 20%, more technological and intelligent
- Intelligent mute, quieter, more comfortable, and more environmentally friendly

Specification and model	Rated output current(A)	Adaptive motor power(kw)	Height(H) Width(W) Depth(D) (mm)
LCJ20-4KW	9.5	4	500*300*186
LCJ20-5.5KW	13	5.5	
LCJ20-7.5KW	17	7.5	
LCJ20-11KW	25	11	
LCJ20-15KW	32	15	
LCJ20-18.5KW	38	18.5	
LCJ20-22KW	46	22	

LF10 SERIES

Permanent Magnet Industrial Fan Specific Frequency Converter

Capacity range

3PH AC 380V±15%
0.75-2.2kw

1PH AC 220V±15%
0.75-1.5kw

Application area

Industrial fan

Product features

- The motor starts and stops smoothly, running smoothly
- Reduce power consumption and reduce full load current
- Reduce the temperature rise of the motor
- Quiet, comfortable, and low noise.

Specification and model	Rated output current(A)	Input parameter	Output parameter	Height(H) Width(W) Depth(D) (mm)
1PH AC 220V±15%				
LF10-0.75KW-2T	0.75	50/60Hz	4A, 0-300Hz	196.5*110.5*76.5
LF10-1.5KW-2T	1.5	50/60Hz	7A, 0-300Hz	
3PH AC 380V±15%				
LF10-0.75KW-4T	0.75	50/60Hz	2.1A, 0-300Hz	265*170*131
LF10-1.5KW-4T	1.5	50/60Hz	3.8A, 0-300Hz	
LF10-2.2KW-4T	2.2	50/60Hz	5.1A, 0-300Hz	

Application cases
